

① 【Please refrain from having large parties !】

- In many cases, one of the guests at a party held at a relative's house was infected, and the infection spread to many of the people at the party.
- The risk of infection is very high when eating and drinking with a large group of people, especially with those who do not live together, as masks are removed when eating.
- Please do not hold or attend any parties as the infection is now spreading at a fast pace.

②【What you should do if you are infected with coronavirus】

- Many people in their 50s or younger tend to become seriously ill when infected with the Delta variant.
- If you are infected with coronavirus and are hospitalized or become seriously ill, you may not be able to earn income for a certain period.
- In addition, if the infection spreads within your company, its operations may be disrupted.
- Moreover, family members of those infected with coronavirus and those who are considered to be close contacts should suspend their studies and work for a while, and stay at home for two weeks.
- Please take steps to protect yourself from the new coronavirus so you can get on with your daily life.

③【Basics of Infection Control】

- Reduce opportunities to meet with people.
- Wear a mask when going out or working.
- When you are not feeling well (fever, sore throat, or other cold symptoms), stop all activities that can cause the infection, such as going to work or school.
- Avoid crowded places and times of the day.
- Since the infection is now spreading, it is advisable to avoid eating in large groups and attending parties and gatherings.
