

This is a request from Gifu Prefecture.

We will be entering the year-end/New Year holiday period, a time when the flow of people will be very active.

Therefore, we would like to ask you, including those who have already been fully vaccinated, to continue to take basic measures to prevent infection (wearing masks, washing hands, avoiding three Cs, frequent ventilation, and cancelling your activities when you are not feeling well).

**Have a happy Christmas  
with proper infection  
prevention!!**

**Enjoy with as few  
people as possible, in  
as short a time as  
possible.**

**Wear a mask and  
drink in moderation.**

**In order to protect the  
people around you,**

cancel your activities when you are  
not feeling well and consult your  
local doctor right away.
